

ALLTASK MISSION STATEMENT

The Alltask mission is to combine innovation, collaboration and the highest service levels to provide a 360° solution for a wide range of scaffolding, thermal insulation, asbestos management and environmental projects.

We lead the way in our field by observing the very best health and safety, mental health, wellbeing and sustainability practices within the construction industry.

Responsibility for the safety and care of our team members, customers and the community as a whole is a vital factor in everything we do,

whatever the circumstances. The obligation to uphold our company core values is placed upon everyone who works for Alltask.

We always deliver on our commitments and clients benefit from the confidence that their projects will be managed and completed in the best way possible when they appoint us.

Our team works hard to maximise client investment and minimise risk in their supply chain by providing competent, intelligent, proactive ongoing project support.

Core Values

- Customer excellence through long-term, mutually beneficial client relationships, built from high performance and a strong health, safety and sustainability focus.
- Helping the UK's construction, refurbishment and engineering workplaces to be accident-free and environmentally sustainable.
- Investing in our people's safety, well-being and development, as the most valuable asset we have.
- Getting our projects right every time through consideration of social, economic, environmental and sustainability impacts.

COMMITMENTS

Our People

Alltask promotes and supports equality and personal development in the workplace to enrich our business for the future and create a sustainable, positive and inclusive culture for all.

Investment

We are 100% committed to helping our team develop both professionally and personally. That is why we invest financially in their development to enable them to be the best they can be.

The Environment

Standout, cost-effective projects improve our scaffolding, insulation, asbestos and environmental services for all our customers. Care and consideration for the environment is vital in everything we do.

Supply Chain

We understand our clients' needs concerning supply chains and have a dedicated in-house team dealing with new clients and maintaining accreditations for existing ones.

Communities

Alltask gives back to the community by encouraging employees to apply for a paid day off to support any scheme that promotes beneficiaries local to our head office or any project undertaken by Alltask.

Health and Safety

We strive to ensure world-class health, safety, and environmental standards are met in everything we do.

Wellbeing

We encourage regular, positive communication and support among our staff. Through this, the Alltask mental health support campaign 'Just Talk' was developed.

Fairness

We value the fresh ideas and perspectives that people from different backgrounds can bring to our business and work hard to create opportunities that will maximise the potential and development of everyone.

Inclusion and Respect

A mutually respectful, open and inclusive workplace attracts the best talent, increases productivity and innovation and improves employee engagement and retention. It reduces stress and conflict and improves job satisfaction, for the wellbeing of all.

Ethics

A high-level of ethical awareness, honesty, and integrity will continue to be maintained at every stage of the work we undertake.
